

Product Information Sheet

- Product Name:** Protein A, recombinant
- Catalog Number:** AS-72233-25
- Amount:** 25 mg
- Purity:** >95% by SDS-PAGE.
- Formulation:** Sterile salt-free liquid at 25mg/ml
- Storage:** Protein A is stable for 1-2 weeks at 4°C. For long-term storage, divide the solution into aliquots and store at -20°C or add an equal volume of glycerol (ACS grade or higher) and store at -20°C without aliquoting. Avoid multiple thaw-freeze cycles. The product is stable for 1 year at -20°C.
- Description:** Protein A is a non-glycosylated cell wall protein of *Staphylococcus aureus* that can bind the Fc part of immunoglobulin molecule of different species with strong affinity.¹⁻⁴ Protein A consists of five IgG binding domains (A, B, C, D, and E), each approximately 60 amino acids long with no cysteines present and two *Staphylococcus aureus* cell membrane binding domains (X and M).³
- AnaSpec's recombinant Protein A consists of only IgG binding domains. Its apparent molecular weight is approximately 30,000 Da compared to 42,000 Da for the native Protein A that is found in *Staphylococcus aureus*. Recombinant Protein A can be used for immunoprecipitation, antibodies purification, and assay development.

Figure 1. Protein A Purity.

Table 1. Protein A affinity to selected species.

Immunoglobulin Species	Protein A Binding
Human IgG ₁ , IgG ₂ , IgG ₄	Strong
Human IgG ₃ , IgD	None
Human IgM, IgA	Weak
Mouse IgG ₁	Weak
Mouse IgG _{2A} , IgG _{2B} , IgG ₃	Strong
Mouse IgM	None
Rat IgG ₁	Weak
Rat IgG _{2A} , IgG _{2B}	None
Rat IgG _{2C}	Strong
Goat IgG ₁	Weak
Goat IgG ₂	Strong
Bovine IgG ₁	None
Bovine IgG ₂	Strong
Guinea Pig IgG	Strong
Rabbit IgG	Strong
Chicken IgG (IgY)	None
