Material Safety Data Sheet (MSDS)

Revision Number: 2.0	Last updated Dec 1	.2, 2012
1. Product and Company Iden	<u>tification</u>	
Product Name:	HiLyte Fluor TM 647 Amine	
Manufacturer/Supplier:	AnaSpec, Inc. www.anaspec.com 34801 Campus Drive Fremont, CA 94555 Tel: 510-791-9560 Fax: 510-791-9572 Email: service@anaspec.com	
Catalog Number	81257	
Unit Size	1mg	

2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification:

GHS Physical Hazards

GHS Health and Environmental Hazards

GHS Signal Words: None

GHS Hazard Statements: H303,H313, Maybe harmful if swallowed or in contact with skin.

GHS Precautionary Statements: P302, P340 May be respiratory irritant if inhaled. May cause respiratory tract

irritation.

Potential Health Effects for:

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give

oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control

measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

3. Composition	<u>on</u>		
Ingredients/C	omponents:		
Chemical N	HiLyte Fluor TM 647 Amine Molecular formula: N/A Molecular weight: 1045.34 CAS-No N/A EC-No N/A		
4. First Aid I	Measures		
Inhalation:	If dust is inhaled, remove from contaminated area.		
	Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.		
Ingestion:	If swallowed do NOT induce vomiting. If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. Observe the patient carefully. Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink. Seek medical advice.		
Skin:	If skin or hair contact occurs: Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.		
Eyes:	If this product comes in contact with the eyes: Wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving eyelids by occasionally lifting the upper and lower lids. If pain persists or recurs seek medical attention.		

Extinguishing media: Special firefighting proced Unusual fire and explosion 6. Accidental Release Me Spill response	lures:	Water spray or fog. Alcohol resistant foam. Dry chemical powder. BCF (where regulations permit). Carbon dioxide Alert Emergency Responders and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Use water delivered as a fine spray to control fire and cool adjacent area. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use. Emits toxic fumes under fire conditions

6. Accidental Release Me		DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.	
6. Accidental Release Me		Cool fire exposed containers with water spray from a protected location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.	
6. Accidental Release Me		location. If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.	
6. Accidental Release Me		If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.	
6. Accidental Release Me		Equipment should be thoroughly decontaminated after use.	
6. Accidental Release Me			
6. Accidental Release Me	ns hazards:	Emits toxic fumes under fire conditions	
Spill response	<u>easures</u>		
		ignition sources.	
		spills immediately.	
		act with skin and eyes.	
		sonal contact by using protective equipment.	
	Use dry clean up procedures and avoid generating dust.		
C		uitable, labeled container for waste disposal	
Containment		ersonal contact, including inhalation.	
		ctive clothing when risk of exposure occurs. Il-ventilated area.	
	DO NOT enter confined spaces until atmosphere has been checked. DO NOT allow material to contact humans, exposed food or food utensils.		
		act with incompatible materials.	
		ling, DO NOT eat, drink or smoke.	
		iners securely sealed when not in use.	
		ical damage to containers.	
		sh hands with soap and water after handling.	
		ccupational work practice.	
	Empty containers may contain residual dust which has the potential to accumulate		
		ettling. Such dusts may explode in the presence of an appropriate	
	ignition sour		
	Do NOT cut	t, drill, grind or weld such containers	
PPE	Use persona	al protective equipment	
7. Handling and Storage			

8. Exposure Controls	Personal Protection			
Engineering controls	Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction. Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace. If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of: (a): particle dust respirators, if necessary, combined with an absorption cartridge; (b): filter respirators with absorption cartridge or canister of the right type; (c): fresh-air hoods or masks Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding. Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting. Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently			
	remove the contamir			
PPE	Use personal protective equipment			
9. Physical and Chemi	cal Properties			
Physical State	Solid			
Odour	Not available			
Solubility in Water	Slightly water soluble			
Specific Gravity	Not available			
рН	Not available			
Boiling Point	Not available			
Melting Point	Not available			
Flash Point	N/A			
Vapor Pressure:	N/A			
Vapor Density:	N/A			
10. Stability and Reac	<u>tivity</u>			
Thermal Decomposition		No data available		
Dangerous Products of		No data available		
Dangerous Reactions		COx, NOx when burned		
		ntilated place. Containers which are opened must be carefully resealed		
11. Toxicological Information				
RTECS Number		N/A		

Toxicity

No information available.

Health Hazards	Although ingestion is not thought to produce harmful
	effects, the material may still be damaging to the
	health of the individual following ingestion, especially
	where pre-existing organ (e.g. liver, kidney)
	damage is evident. In an occupational setting however,
	ingestion of insignificant quantities is not thought to be
	cause for concern.
Potential Hazards	Not available
Carcinogenicity:	No significant acute toxicological data identified
OSHA Permissible Exposure Limit(PEL) Data	N/A
ACGIH Threshold Limit Values (TLV)	N/A
	·

Reproductive Toxicity:

No information available

12. Ecological Information

No information available.

13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

14. Transport Information

Hazard Class	N/A	
Identification Number	N/A	
Packing Group	N/A	
Proper Shipping Name (DOT)	N/A	

15. Regulatory Information

California Proposition 65: N/A

US TSCA (Toxic Substance Control Act): N/A

US CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act: N/A

US SARA Title III (Superfund Amendments and Reauthorization Act: N/A

US Other: N/A

EC EINICS (European Inventory of Existing Commercial Chemical Substances) Number: N/A

EC Risk Statements: N/A

Other Country Regulations: N/A

16. Other Information

It is not intended for food, drug, household, agricultural or cosmetic use. A technically qualified individual experienced in handling potentially hazardous chemicals must supervise its use. The

above information is believed to be correct but does not purport to be all inclusive and shall be used only as a guide. Users should make independent decisions regarding completeness of the information based on all sources available. AnaSpec shall not be held liable for any damage resulting from handling or from contact with the above product.
