

Product Data Sheet

Product Name: Tat-C (48-57)
Catalog Number: AS-62063 (1 mg) **Lot Number:** See label on vial
Sequence: H-Cys-Gly-Arg-Lys-Lys-Arg-Arg-Gln-Arg-Arg-Arg-OH (3-letter code)
CGRKKRRQRRR (1-letter code)
Molecular Weight: 1500.8
% Peak Area by HPLC: ≥ 95
Appearance: Lyophilized white powder

Peptide Reconstitution: Using H₂O, reconstitute by adding 100 µl to 1 mg Tat-C peptide.

Storage: Tat-C peptide is shipped at ambient temperature. Upon receipt, store lyophilized peptide at –20°C or lower. Reconstituted peptide can be aliquoted and stored at –20°C or lower.

Description: This peptide is amino acids 48 to 57 fragment of TAT with an additional cysteine residue at the N-terminus. This peptide contains the protein transduction domain (PTD) of the HIV Tat protein that inhibits HSV-1 entry. The addition of a cysteine residue to the N-terminus of the Tat-PTD (Tat-C peptide) improves the antiviral activity against HSV-1 and HSV-2. Tat-C acts extracellularly, blocking entry of adsorbed virus immediately without eluting virions. Ref: Bultmann, H. et al. *Antimicrob. Agents Chemother.* **51**, 1596 (2007).
